

## Patent

In the Claims:

1-20. (Cancelled).

21. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

receiving said picture file at said cellular telephone;

simultaneously displaying a plurality of picture files on a display of said cellular telephone;

enabling a user to change information displayed with said picture file of said plurality of picture files by way of a user interface on said cellular telephone;

providing a separate selection option for each picture file of said plurality of picture files when said plurality of picture files is displayed on said cellular telephone;

enabling a user to separately select a selection option for each picture file of said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files; [[and]]

enabling access by said user, remote from said cellular telephone by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a user to change information associated with said plurality of picture files by way of said webpage for a user associated with a wireless service provider for said cellular telephone.

22. (Previously Presented) The method of claim 21 wherein said step of receiving said picture file at said cellular telephone comprises receiving said picture file by way of a wireless link of a telecommunications network.

Patent

23. (Previously Presented) The method of claim 21 wherein said step of receiving said picture file at said cellular telephone comprises receiving said picture file as a attachment to an email.
24. (Previously Presented) The method of claim 21 further comprising a step of storing said picture file on said cellular telephone.
25. (Previously Presented) The method of claim 21 wherein said step of providing a selection option comprises providing a selection box associated with said picture file which can be selected by a user.
26. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:
- storing a plurality of picture files on said cellular telephone;
  - simultaneously displaying said plurality of picture files on a display of said cellular telephone;
  - enabling a user to change information displayed with a picture file of said plurality of picture files by way of a user interface on said cellular telephone;
  - providing a separate selection option for each picture file of said plurality of picture files displayed on a display of said cellular telephone;
  - enabling a user to separately select a selection option for each picture file of said plurality of picture files displayed on said cellular telephone;
  - displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files; [[and]]
  - enabling access by said user, remote from said cellular telephone by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and
  - enabling a user to change information associated with said plurality of picture files by

Patent

way of said webpage for a user associated with a wireless service provider for said cellular telephone.

27. (Previously Presented) The method of claim 26 further comprising a step of receiving said at least one picture file by way of a wireless link of a telecommunications network.

28. (Previously Presented) The method of claim 27 wherein said step of receiving a picture file by way of a wireless link of a telecommunications network comprises receiving said picture file as an attachment to an email.

29. (Previously Presented) The method of claim 26 wherein said step of enabling a user to designate said selection option further comprises a step of enabling a user to select a function for presenting said picture file.

30. (Previously Presented) The method of claim 26 further comprising a step of enabling said user to enlarge said picture file.

31. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

simultaneously displaying a plurality of picture files on a cellular telephone;

enabling a user to change information displayed with a predetermined picture file of said plurality of picture files by way of said user interface on said cellular telephone;

providing a separate selection option for each picture file of said plurality of picture files when said plurality of picture files is displayed on said cellular telephone;

enabling a user to separately designate a selection option for each picture file of said plurality of picture files;

enabling a user to enlarge a picture file of said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options

## Patent

associated with said plurality of picture files; [[and]]

enabling access by said user, remote from said cellular telephone by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a user to change information associated with said plurality of picture files by way of said webpage for a user associated with a wireless service provider for said cellular telephone.

32. (Previously Presented) The method of claim 31 wherein said step of displaying a picture file on a cellular telephone comprises displaying a thumbnail of said picture file.

33. (Previously Presented) The method of claim 32 wherein said step of enlarging said picture file comprises a step of displaying said picture file as a window on a display of said cellular telephone.

34. (Previously Presented) The method of claim 31 further comprising a step of enabling the selection of said picture file by enabling a user to select a selection box to indicate that a selection has been made.

35. (Previously Presented) The method of claim 31 further comprising a step of presenting said picture file having a designated selection option according to a user selectable function.

36. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

storing a plurality of picture files on said cellular telephone;

simultaneously displaying said plurality of picture files as thumbnails on said cellular telephone;

enabling a user to change information displayed with a picture file of said plurality of picture files by way of a user interface on a cellular telephone;

Patent

providing a plurality of selection options, each said selection option being associated with a picture file of said plurality of picture files;

enabling a user to separately designate each said selection option associated with said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files; [[and]]

enabling access by said user, remote from said cellular telephone, by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a user to change information associated with said plurality of picture files by way of said webpage for a user associated with a wireless service provider for said cellular telephone.

37. (Previously Presented) The method of claim 36 further comprising a step of receiving at least one picture file of said plurality of picture files by way of a wireless link of a telecommunications network.

38. (Previously Presented) The method of claim 37 further comprising a step of enabling the selection of a picture file of said plurality of picture files by enabling a user to select a selection box to indicate that a selection has been made.

39. (Previously Presented) The method of claim 38 further comprising a step of enabling the enlargement of a picture file displayed during said step of displaying said subset of said plurality of picture files.

40. (Previously Presented) The method of claim 39 wherein said step of enabling a user to designate each said selection option associated with said plurality of picture files comprises a step of enabling a user to designate a selection box to select a display feature.

## Patent

41. (Currently Amended) A cellular telephone capable of displaying a picture file, said cellular telephone comprising:

a control circuit;

a memory coupled to said control circuit and storing a plurality of picture files;

a user interface coupled to said control circuit and enabling the user to access said plurality of picture files, said user interface enabling a user to separately change information and display options displayed with each picture file of said plurality of picture files;

a display coupled to said control circuit and displaying said picture file with said plurality of picture files, each picture file of said plurality of picture files being simultaneously displayed with a separate selection option when said cellular telephone is in a first mode, wherein a subset said plurality of picture files selected by said selection options are separately displayed according to a selected display function when said cellular telephone is in a second mode; [[and]]

a webpage associated with a wireless service provider for said cellular telephone, said webpage enabling access by said user, remote from said cellular telephone, to said picture file and said information which has been changed, and enabling said user to change information associated with said plurality of picture files.

42. (Previously Presented) The cellular telephone of claim 41 wherein said selection option comprises a selection box.

43. (Previously Presented) The cellular telephone of claim 41 further comprising an icon on said display, said icon enabling access to said picture file when said icon is selected.

44. (Cancelled) The cellular telephone of claim 41 further comprising a plurality of picture files stored in said memory.

45. (Previously Presented) The cellular telephone of claim 42 further comprising a plurality of selection boxes, each said selection box stored with a picture file of said plurality of picture

Patent

files.

46. (Previously Presented) The cellular telephone of claim 45 wherein each selection box of said plurality of selection boxes enables a user to select a function for displaying said plurality of picture files.

47. (Previously Presented) The cellular telephone of claim 41 wherein said user interface enables the selection of said selection box.

48. (Previously Presented) The cellular telephone of claim 41 wherein said user interface enables the user to enlarge a picture file.

49. (Previously Presented) The cellular telephone of claim 41 wherein said plurality of picture files comprises a plurality of thumbnails.
